

Task 1

Bug Reports and Test Cases on the website **ac.utcluj.ro**

Bug Report 1:

Summary: Site search returns “No matches” for words that appear on the site, such as “admitere”

Environment: Desktop, Microsoft Edge, <https://ac.utcluj.ro>, October 6th, 2026

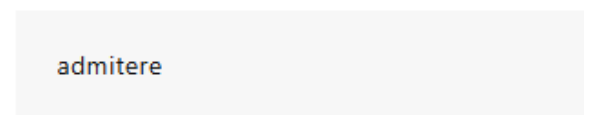

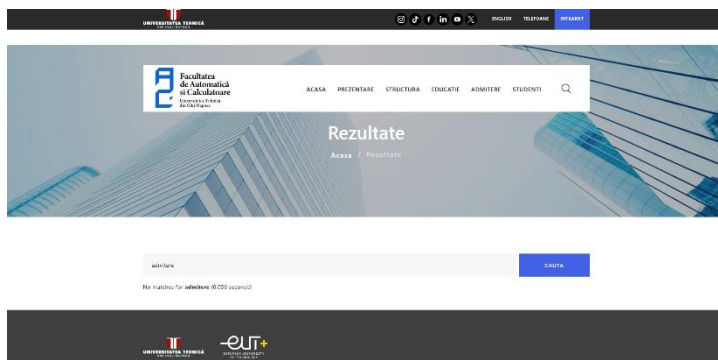

Steps:

1. Open <https://ac.utcluj.ro/acasa.html>
2. Type “admitere” in the search field
3. Press Enter

Expected result: Results include the “Admitere licenta”, “Admitere master” and “Admitere doctorat” pages, which exist on the site and contain the word

Actual result: “No matches for admitere”. The website fails to show anything at all.

Evidence:

No matches for **admitere** (0.056 seconds)

Impact: High

Bug Report 2:

Summary: “English” language switch always opens the English homepage instead of the equivalent page

Environment: Desktop, Microsoft Edge, <https://ac.utcluj.ro/admitere-licenta.html>, October 6th, 2026

Steps:

1. Open <https://ac.utcluj.ro/admitere-licenta.html>
2. Click “English” in the top bar

Expected result: The English version of the same page opens (the website has an equivalent page, <https://ac.utcluj.ro/admission/bachelor.html>)

Actual result: The English homepage (<https://ac.utcluj.ro/home.html>) opens, and the user has to find the page again by navigating.

Evidence:

Impact: Medium

Bug Report 3:

Summary: The event on the English homepage links to a 404 error page

Environment: Desktop, Microsoft Edge, <https://ac.utcluj.ro/home.html>, October 6th, 2026

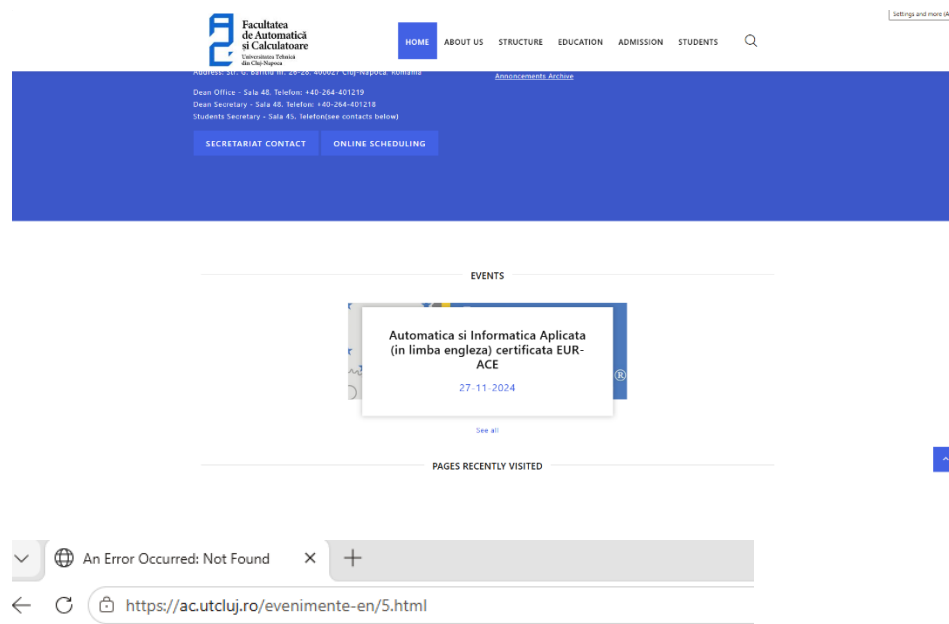

Steps:

1. Open <https://ac.utcluj.ro/home.html>
2. Scroll to the “Events” section and click the title “Automatica si Informatica Aplicata (in limba engleza) certificata EUR-ACE”

Expected results: The event details page opens

Actual results: A 404 error page opens.

Evidence:

Oops! An Error Occurred

The server returned a "404 Not Found".

Something is broken. Please let us know what you were doing when this error occurred. We will fix it as soon as possible. Sorry for any inconvenience caused.

Impact: Low

Test Case TC-001:

Title: Search finds existing pages by keyword

Preconditions:

- The browser is open and connected to the internet
- <https://ac.utcluj.ro/acasa.html> is accessed

Steps:

1. Click the search field
2. Type “admitere”
3. Hit enter

Expected result: A results page opens listing the pages that contain “admitere”, including “Admitere licenta”, “Admitere master” and “Admitere doctorat”.

Test Case TC-002:

Title: Language switch opens the English version of the current page

Preconditions:

- The browser is open and connected to the internet
- <https://ac.utcluj.ro/admitere-licenta.html> is accessed

Steps:

1. Find the “English” link in the top bar
2. Click “English”

Expected results: The English version of the same page opens (<https://ac.utcluj.ro/admission/bachelor.html>), so the user stays on the same topic in the other language.

Test Case TC-003:

Title: All internal links on the Romanian homepage open without errors

Preconditions:

- The browser is open and connected to the internet
- <https://ac.utcluj.ro/acasa.html> is accessed

Steps:

1. Click each internal link in the header menu, then return to the homepage
2. Repeat for every link in the “Anunturi” section, plus “Arhiva Anunturi”
3. Repeat for the “Evenimente” section, plus “Afiseaza toate”
4. Repeat for the links in the footer that point to ac.utcluj.ro

Expected results: Every link opens a valid page with content. No link leads to a 404 or any other error page.

Testing techniques used:

1. Error guessing

I used the error guessing testing technique by knowing spots where websites usually tend to fail. Multilingual websites tend to fail in a few predictable places, so I tested those:

- a. Language switching:** Translations are often only linked at the homepage level, so switching from a Romanian inner page to the English version of the website got me at the homepage.
- b. Secondary-language content:** The English version usually gets less maintenance than the Romanian one. I followed the event links on the English homepage, which led to a 404 page and an inconsistent date.
- c. Search with real keywords:** Site search is often badly configured or never indexed. I searched for a word that clearly exists on the site (“admitere”) and got “No matches”.

2. Exploratory testing

I had no requirements or documentation for the website, so I had to explore it manually, step by step. I went through the homepage and identified the main features, tried them and found bugs like the search one and the English page one.
